## START WITH YOUR PART... AND FINISH WITH HAR-CONN

# WHO IS HAR-CONN?

Har-Conn is one of the largest, independently-owned aerospace processing firms in the world – specializing in aerospace and high-technology applications of electroplated and related coatings for over 60 years. Our reputation for quality and service is outstanding. Just ask any of our more than 2000 customers worldwide!

You can find our work in such important and diverse areas as the space shuttle, the missile program, military and commercial aircraft engines, airframe and landing gears, surgical instruments, computer components, avionics, laser equipment, and automotive and electronic equipment.

At Har-Conn, we combine an experienced technical staff with a commitment to customer service to get your job done right – and on time!

## WHAT DOES HAR-CONN DO?

At Har-Conn, we apply engineered-type electroplated, electroless coatings, dry film lubricants and high-temperature coatings used for corrosion resistance and chemical conversion coatings. We finish all parts to our customers' specifications/blueprints. As an overhaul and repair station, we also repair worn parts. Additionally, for mis-machined product, we can refinish the part so that it can be restored to its original dimension tolerances.

No job is too large or too small. Our technical experts process parts from the very large (such as jet engine turbine cases and landing gear cylinders) to the very small (such as cobalt X-ray elements, 1.6 million pieces to the kilogram).

We consistently pride ourselves in meeting committed lead-times and providing a quality result. We believe our competitive advantage lies in the excellence of our people and our superior products.

# INDUSTRIES SERVED

Har-Conn is proud of its many long-term relationships in the aerospace industry. These specialized areas include:

- Commercial & Military
- Original Equipment Manufacturers
- Maintenance
- Overhaul & Repair (TB5R217N)
- Fixed & Rotary Wing Airframe

You can also find our work in such diverse areas as:

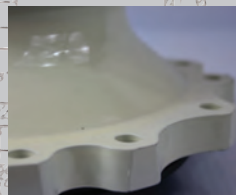

- Power Generation
- Medical
- Fire & Emergency
- Injection Mold
- Firearms
- Chemical & Petroleum
- Power Plant
- Prototype Research
- Electronics

ANODIZE

HI-TEMP  
ALUMINUM COATING

PAINT

ELECTROLESS NICKEL

HARD COAT

## START WITH YOUR PART... AND FINISH WITH HAR-CONN PROCESS

As an aerospace subcontractor we provide you with all the assistance you need to perform your job including...

- Engineering Support
- Production Control
- Technical Expertise
- Quality Control

Processes Provided:

- Primers, Paints & Coatings
- Plating
- Conversion Coating
- Cleaning/Abrasive Blast
- Dry Film Lubricants/Anti Gallants
- Powder Coating

If a company is measured by the level of customers it has, then we are at the top. Har-Conn is accredited, or source-approved, by major companies throughout the world. Take a look at the world-class corporations on our Prime Contractor List:

- Boeing Company
- Curtiss-Wright Corporation
- Eaton Corporation
- Ensign-Bickford
- General Electric Co.
- Goodrich
- Hamilton Sundstrand
- Honeywell
- Kaman Aerospace
- Messier Dowty
- Northrop Grumman
- Parker Hannifin
- Pratt & Whitney Aircraft
- Pratt & Whitney Canada
- Raytheon, Inc.
- Rolls-Royce
- Sikorsky Aircraft
- Triumph Group
- Volvo
- (FAA)

# CONTACT

Our commitment to excellence is evident in our devotion to quality, service and training. We have a tradition of generous annual investment in our two greatest resources: capital equipment, and technical training. In this way, we can offer up-to-date services to our customers who demand technical excellence as well as first-rate service.

Our quality control system is designed to meet the most stringent requirements of any prime contractor specification. Our annual customer rejection rate (parts rejected by customer/total parts processed) has been consistently less than 0.5% for all processing. We are very proud of this record. Low rejects save our customers time and money, by getting the job done right – the first time.

Providing a quality product creates loyal, satisfied customers.
